Planar luminance: TFT BlackMura														
<b>Test Implementation</b>														
<b>Test procedure:</b>														
The test sample is positioned vertically in a device-specific plastic fixture. The power supply for the device is set to $(13.0 \pm 0.1)$ V at room temperature $T = (23 \pm 3)$ °C. The measurements start when the sample has been warmed up for 30 minutes.														
<b>Measuring / Test Instruments</b>														
<b>Measuring system:</b>														
-Camera:	CCD measuring camera (LMK5-1 Color) s/n TTE4225													
-Lens:	- Changeable lens color TT 50mm focusable s/n TT50-C213525 - Conoscopic lens for LMK Color piece (angle of coverage +60°) s/n TTC-134													
-Software	LMK Laboratory Software 4 Program version: 20.09.16													
<b>Test parameters:</b>														
Test voltage:	$(13.0 \pm 0.1)$ V													
Test temperature:	TRT= $(23 \pm 3)$ °C
